RE: Annual Backflow Test

Account #: 000001-002 **Service Meter #:** 12345 **Backflow Serial #:** 12345
Address: 560 Magnolila Ave

To Whom It May Concern:

The backflow prevention device(s) for your water service(s) is(are) due for its annual tests, as required under the District's Regulations Governing Water Service 11-3.2. If you have more than one backflow prevention device, a separate test is required for each device.

The District requires that you have this test performed by a certified backflow prevention assembly tester possessing a valid certification issued by the American Water Works Association (AWWA) or the County of Riverside Department of Environment Health. For your convenience, we are including a list of District approved certified testers. This list is not comprehensive and any certified tester with a valid certification may be used.

After the completion of the tests showing that the devices are operating satisfactorily, the certified tester shall complete a Backflow Prevention Assembly Test Maintenance Report and submit the results within then (10) calendar days of the test date. If the test discloses that the device is not operating satisfactorily, please have the necessary repairs made and the device retested by a certified tester within fourteen (14) days of the initial test date.

Please forward a copy of the completed report, along with a copy of the tester's certification card (if not on the approved list), to the District's office or email (backflow@bcvwd.org) no later than **August 15, 2023**. Failure to have your backflow device tested within 45 days of this letter will result in the services being in non-compliance and may result in discontinuation of water service under the District's Regulations Governing Water Service 7-1.2.

Thank you,
