

Division 1

Andy Ramirez
Vice President

Beaumont-Cherry Valley Water District

Andy Ramirez has served on the Beaumont-Cherry Valley Water District (BCVWD) Board since 2016. He is an experienced public servant who has worked in various executive roles, including Director of Public Works and Assistant City Manager at local municipalities, where he oversaw water and sewer utilities, capital improvement programs, economic development, and technology innovation. Director Ramirez is known for simplifying organizational complexities, improving operational and budgetary efficiencies, completing projects effectively, and building cohesive teams. He holds a master's degree in public administration and graduated with highest honors from California Baptist University. He resides with his wife and children in Beaumont, California.

Commitment to Service and Progress

As a board member, Director Ramirez has ensured that district policies translate into meaningful progress and successful infrastructure investments. His contributions include advancing water-conservation projects; establishing a cooperative agreement for recycled water; securing federal grants for advanced meter infrastructure modernization; and securing \$2.5 million in grant funding for the construction of the Beaumont MDP Line 16 Project—a joint effort between the Riverside County Flood Control and Water Conservation District (RCFC & WCD) and BCVWD. This major infrastructure project protects the Cherry Valley community from local flooding and reduces reliance on imported water by conveying up to 500 acre-feet of stormwater annually to the zone Noble Creek Recharge Facility, which helps recharge the Beaumont Groundwater Management and provides water for up to 900 families. Director Ramirez also represented the water district at ACWA 2025 as an innovation panelist where the BCVWD was recognized as a finalist advanced meter innovation. Additionally, Director Ramirez advocated for residents who lost income during COVID-19 to seek financial relief through the United Lift Rental Assistance Program.

Professional Experience

Mr. Ramirez began his water-industry career in the late 1990s installing water and sewer pipelines. His diverse public-sector experience includes service with the cities of Hemet, San Jacinto, San Bernardino, Palm Desert, and Loma Linda. His leadership spans fire & safety administration, city management, operational leadership, economic development, water, sewer, capital improvements, and technology innovation. With over more than a decade in municipal government, he has collaborated with regional partners such as WRCOG, OCWD, and MWDOC to advance infrastructure, water sustainability, and community development. He and his family remain active volunteers at their local church.
